Review score vs delivery performance

Hero finding — perfectly linear relationship

Every star drop = higher late rate. Improving on-time delivery is the single highest-leverage action to lift platform scores.

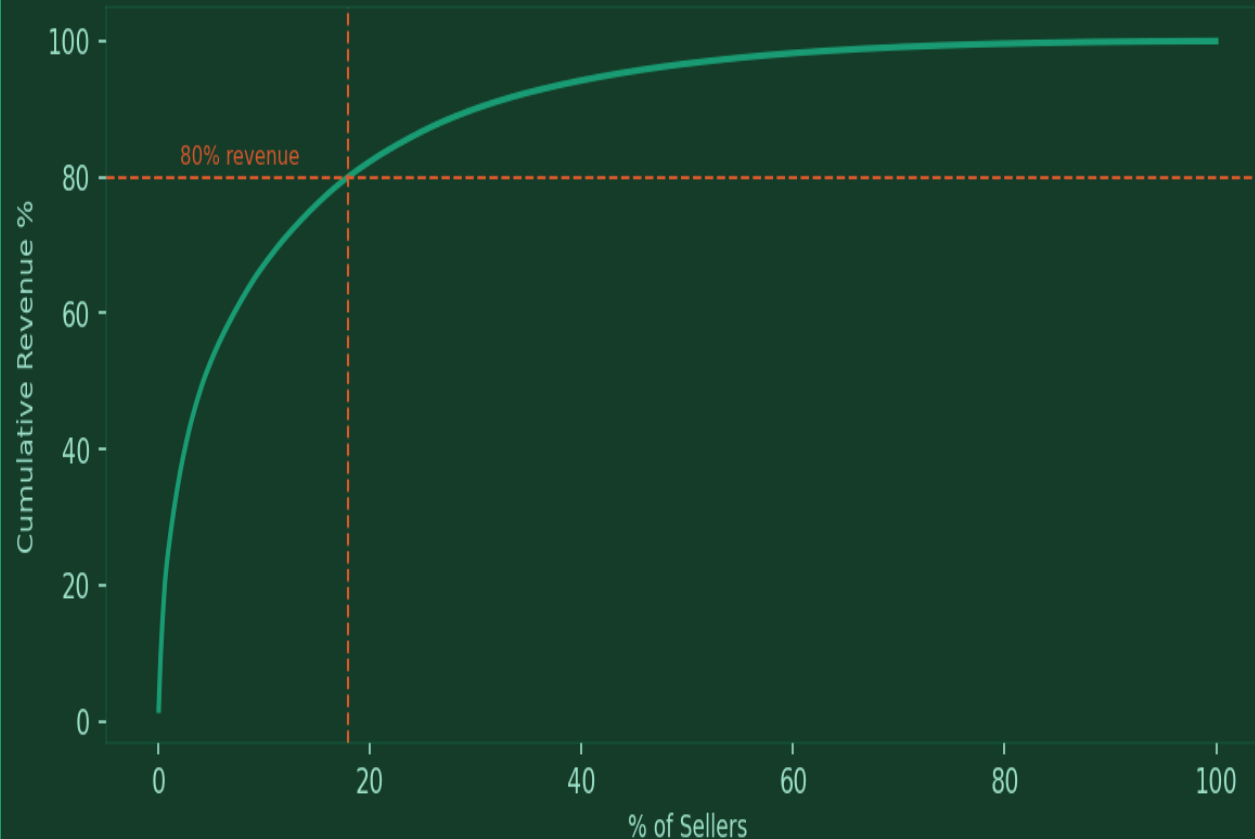

Late Rate by state

Northern states (AL, MA, PI) have 5-6x the late rate of SP. Open fulfillment centers in northeastern Brazil to close the gap.

| Health_beauty generates 3× more revenue than the next category — and top 10% of sellers drive 80% of platform revenue.

TOP SELLER REVENUE

227K

Worst delivery by category

| Top 10% of sellers drive ~80% of platform revenue. Invest in mid-tier seller growth and retention programs for top performers to reduce concentration risk.

| Office furniture takes 20+ days to deliver and scores 3.52 — worst in both metrics. Heavy items damage logistics performance and drive customer dissatisfaction.
